

Project Design Phase-I
Proposed Solution Template

Date	19 September 2022
Team ID	PNT2022TMID07389
Project Name	Project –Personal assistance for seniors who are self-reliant
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Aged people sometimes forget to take their medicine at the correct time, or might forget which medicine should be taken at which time. This makes it difficult for the doctors/caretakers to monitor the patients properly around the clock.
2.	Idea / Solution description	To design a medicine reminder system, which is an application built for the user/caretaker, which enables them to set the actual time and medicine. When it is time to take the medicine.
3.	Novelty / Uniqueness	The proposed model continuously monitors the patient and produces reports on their medicine intake data, while also using this available data to alert the user using Voice Commands, ensuring an efficient reminder method.
4.	Social Impact / Customer Satisfaction	Encourages proper medicine intake for the elderly patients, thus ensuring them a good and a healthy life.
5.	Business Model (Revenue Model)	The low cost requirement for designing this proposed model makes it more reliable and user friendly. This makes the model more practical for widespread use in hospitals and homes for efficient medicine intake.
6.	Scalability of the Solution	With efficient usage of IBM cloud, this proposed model will be able to handle a large number of user data. This makes a huge number of users to easily access and efficiently use
