### Delivery Pipelines

Name: pipeline

Status: No stages defined

Name: pipeline

Status: Started

### Getting started quickly

#### Configuring your app

To connect services and DevOps toolchains to your app:

1. Use the **Services** card to connect a service to your app. Select an existing service instance, or create a new one. [Learn more](#).
2. If you want to view the code before your app is deployed, click **Download code** to obtain the app file.
3. Click **Deploy your app** in the **Deployment Automation** card to select the deployment target and configure the Continuous Delivery service. The deployment begins automatically.
4. After the deployment begins, you can view the status of the deployment, modify your app, view your logs, or view the app's URL.
